

Comcast Digital Voice® Calling Features

-  **Call Waiting** Take a second call without disconnecting the first and then return to the first caller, so you never miss important news.
-  **Caller ID** Your phone display will show the name and number of the person calling, so you can decide if you want to answer the call, or let Voice Mail handle it.
-  **Caller ID with Call Waiting** When you're in the middle of a call and another call comes in, you can see the number and name of the second person calling and decide if you want to answer it, or let it go to Voice Mail.
-  **Call Screening** Create a list of numbers that will receive notification that you are not accepting calls.
-  **Call Forwarding** Forward all your incoming calls to another phone (like your cell). Comes in handy when you're expecting an important call, but need to leave your house.
-  **Call Forwarding Selective** Create a select list of numbers you want forwarded to another phone while you are away from home.
-  **Call Return (*69)** Miss a call? Find out who called and automatically call them back.
-  **3-Way Calling** Chat with two separate people at once.
-  **Anonymous Call Rejection** Any call from a location that has blocked the display of its number will be rejected. Only callers who allow their numbers to be displayed will ring through.
-  **Repeat Dialing** Automatically redial a number until the line is available, while still making and receiving calls.
-  **Speed Dial** Program up to 30 phone numbers that can be dialed with a one- or two-button code.
-  **Call ID Blocking** Block your name and number from showing up on other people's Caller ID; instead your call will show up as Private or Anonymous. Set it for specific calls, or all calls made from your home.
